PEOPLE. POWER. PARTNERSHIP.

Pushing Performance
Since 1945

HARTING Live Web-Seminar
on January 17, 2024

How standardisation for data centres
can reduce costs and speed up
time-to-market

How standardisation for data centres can reduce costs and speed up time-to-market

In this Web-Seminar you will discover:

- How standardisation based on the Open Compute Project (OCP) can help to reduce the total costs of ownership (TCO)

- How reduced complexity speeds up time-to-market

- How space efficient components leave more IT space for computer equipment

- How connector selection can improve energy efficiency by up to 50 %

Tailor your Web-Seminar!
Additionally you also have the opportunity to tailor the contents of this Web-Seminar. Is there something you have always wanted to know about our solutions for data centres? Please enter your question on the registration form.
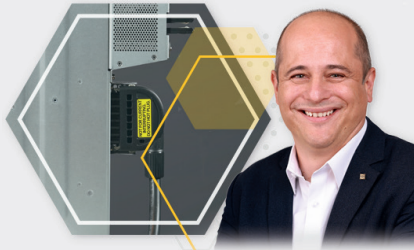

**LIVE WEB-SEMINAR
ON JANUARY 17, 2024**

REGISTER NOW AND
ATTEND FREE WEB-SEMINAR:
www.HARTING.com/dcseminar
